EXISTENCE AND UNIQUENESS RESULTS FOR
SOLUTIONS TO INITIAL VALUE PROBLEMS IN
SCALES OF BANACH SPACES

A THESIS PRESENTED IN PARTIAL FULFILMENT FOR
THE DEGREE OF MASTER OF SCIENCE IN
MATHEMATICS AT
MASSEY UNIVERSITY

David Warren Bulger

1992

Abstract

This thesis addresses existence and uniqueness of solutions to certain classes of initial-value problems with functional differential equations. The technique of scales of Banach spaces is used. A scale of Banach spaces is a collection of Banach spaces varying on a real parameter. A scale consisting of function spaces can be used to suppress one variable in an initial-value problem in a partial differential equation of two independent variables, therefore enabling local existence and uniqueness of a solution to the problem to be shown with the classical method of successive approximations from the Picard-Lindelöf Theorem of ordinary differential equations. Tuschke's presentation (c.f. [7]) of this technique and a related theorem has been adapted in Chapters 1 and 2. Chapters 3 and 4 present original theorems, stating existence and uniqueness of solutions to more general initial-value problems, having a retarded character.

Acknowledgements

I wish to thank my supervisor, Dr Bruce van-Brunt, for pointing me in the right direction, and for helping me to understand this material.

Contents

Acknowledgements	iii
Table of Contents	iv
List of Figures	vi
1 Scales of Banach Spaces	1
1.1 Introduction	1
1.2 The Picard-Lindelöf Theorem in a Banach Space	2
1.2.1 Proof of Existence	3
1.2.2 Proof of Uniqueness	5
1.3 Complex Differentiation as an Unbounded Operator	6
1.4 Scales of Banach Spaces	9
2 IVPs in Scales of Banach Spaces	12
2.1 Mappings into Scales of Banach Spaces	12
2.2 Generalised Cauchy-Riemann Operators	14
2.3 Proof of Existence	16
2.4 Proof of Uniqueness	25
3 An Integro-Differential Equation in a Scale of Banach Spaces	33
3.1 Proof of Existence	38
3.2 Proof of Uniqueness	48
4 A More General Retardation Operator	51
4.1 Proof of Existence	55
4.2 Proof of Uniqueness	64

5	Conclusion	68
5.1	Summary	68
5.2	Further Work	69
	Bibliography	71
